PROFILE

I run creator campaigns and live activations for gaming and consumer brands: online, off-ground, and on-ground, integrated or end-to-end. Samsung India's activation agency has kept me as the sole cosplay and creator talent partner for Samsung events from 2024 through 2026 without a single re-pitch, and AMD, Lenovo, Riot Games, Garena, and the Government of India keep coming back. Before going full-time independent, I scaled a 200K+ community at BlueStacks, co-founded an esports org, headed the cosplay division at an influencer agency, and closed partnerships in brand management and BD contracts. I am also a cosplayer and Twitch Affiliate, which means I sit on both sides of every creator deal I negotiate.

I am openly pro-AI. I run LLM tools daily across outreach, campaign operations, and reporting, and I ship production software through AI-assisted development. My current build is a two-sided platform that lets brands discover cosplay talent, negotiate directly, and manage long-term partnerships instead of one-off deals. It is in testing now.

SIGNATURE CAMPAIGNS

- Samsung Galaxy Cup & Galaxy Unpacked (2024-2026):** sole cosplay and creator talent partner via Samsung's activation agency, running four creators per event fully remote, brief to publish; the retention is the result
