PROFILE

Gaming-native marketer who grew up inside the communities Web3 and iGaming brands are trying to reach. Scaled a 200K+ member community at BlueStacks, co-founded and ran an esports org with 30+ athletes, and now runs activations for Samsung, AMD, Riot Games, and Garena as a retained creator and cosplay talent partner. Fluent in streamer economics, Discord culture, and KOL negotiation: the levers that decide acquisition in crypto gaming and iGaming. Builds with AI daily and ships production software, including a brand-to-talent partnership platform now in testing.

WHAT I BRING TO WEB3 & IGAMING

- Community at scale:** grew BlueStacks to 200K+ members with a 12-member mod team; Discord-native operations and moderation playbooks
- KOL & streamer networks:** 7 years sourcing, negotiating, and managing gaming creators across India and SEA; Twitch Affiliate myself, so I deal with streamers as a peer, not a procurement line
- Esports operations:** co-founded Entrare Esports; ran 30+ athletes and 15+ creators, including an all-female Valorant roster competing across SEA; semi-pro Warzone player myself (Nvidia India tournaments)
- Activations that pull crowds:** 45K footfall at Comic Con Delhi (Lenovo x Intel), 20K at Riot Valorant Convergence, 8K at AMD GameOn: the same event ops that power a SIGMA or TOKEN2049 brand presence
- Pipeline discipline:** 2,000+ lead pipeline, 50+ demos, 10+ partners onboarded in a 5-month BD contract
- Builder mindset:** computer science background; ships production apps through AI-assisted development on Next.js and Cloudflare

EXPERIENCE
